Director/Producer/DOP/Editor Biography - Erez T Yanuv Barzilay was a pioneer of the Internet revolution in his native Israel. Erez created one of the first interactive websites to offer an extensive and exclusive coverage of his own journeys following the **Rwandan Genocide**.

As a leading international affairs journalist Erez produced, directed and written hundreds of television and radio reports, feature presentations and half a dozen independent feature documentaries.

Erez has circled the globe several times, always in search of the unexposed and least travelled paths on Earth.

With strong journalism senses, a natural talent for composure and timing and an unrelenting drive to uncover injustice, Erez has always managed to get to the story first, exclusively and to bring home unparalleled images, sound recordings and first hand eyewitness accounts.

Erez is a champion of achieving great results under almost any circumstances, especially in the volatile and unpredicted environment of the field.
